Profile

Software engineering student and QA Engineer with hands-on experience in automated testing, functional/regression testing, and quality assurance practices. Skilled in designing test strategies, implementing automated frameworks, and ensuring product reliability through modern QA tools and Agile methodologies. Experienced in both academic and professional projects, eager to contribute expertise in building, testing, and delivering scalable, high-quality software solutions.

Experience

Quality Assurance Engineer (Working Student)

April 2025 – Present

LUMASERV, Germany

- Conduct functional and regression testing for backend and frontend services, ensuring product quality and stability.
- Designed automated test cases and improved bug tracking, reducing release defects.
- Collaborated closely with developers in Agile sprints, improving feedback cycles and deployment quality.

Back Office Specialist

June 2023 – March 2025

TELUS International AI Data Solutions, Essen

- Handled 100+ client cases weekly with 95%+ accuracy, ensuring compliance and smooth operations.
- Streamlined administrative workflows, contributing to faster case resolution.

Projects

Personal Portfolio Website (React)

July 2024

- Developed an interactive portfolio showcasing projects and experience.
- Integrated Firebase hosting and optimized UI/UX with animations and responsive design.

Food Delivery Platform (Spring Boot)

October 2023 – March 2024

University of Duisburg-Essen

- Built a full-stack food delivery platform enabling simulated transactions for 50+ users.
- Implemented secure **API-based payment and order workflows** with high test reliability.
- Designed a scalable architecture for multi-restaurant and customer interactions.

Power Consumption Calculator (C++)

October 2023 – March 2024

University of Duisburg-Essen

- Developed a C++ application that estimated household electricity costs with 95% accuracy vs. real billing.
- Applied object-oriented principles to ensure modularity and scalability across multiple scenarios.

Education

B.Sc. of Computer Engineering (Software Engineering)

October 2022 – Present

Universität Duisburg-Essen, Germany

Cambridge Advanced Level

September 2019 – June 2021

Riyadh, Saudi Arabia

Skills

Languages: C, C++, C#, Java, Python, PHP, JavaScript, TypeScript

Web & Frameworks: Spring Boot, .NET, Laravel, Livewire, React, Angular, Vue.js, PrimeVue, Elysia, Bun

Databases: MongoDB, PostgreSQL, MySQL, MariaDB

Testing & QA: Playwright, Cypress, Selenium, JUnit, PHPUnit, Postman

DevOps & Tools: Docker, Kubernetes, Git, GitHub, Jira, CI/CD, UNIX/Linux, Firebase

Practices: Agile (Scrum), SDLC, Database Optimization, API Integration

Languages

Arabic (native), English (fluent), German (proficient).
